Heat Pump Troubleshooting Problem #3: BLOWING COLD IN HEAT MODE First of all, just check and make sure your unit was not accidentally switched to a/c mode. Next, check your outdoor unit is not iced over (see Heat Pump Troubleshooting Problem #1).

Heat Pump Troubleshooting: 3 Common Problems and Solutions

Clean off your heat pump and clear away any debris that may be blocking the way. Air filter is dirty: Air filters are put in place to catch dirt and debris, but when too much builds up, it can block airflow to the compressor, the part of the unit that actually heats the air. This solution is simple, too.

4 Most Common Heat Pump Problems & What To Do | HVAC.com

Also be aware that the heat pump will have to work harder to produce heat when in defrost mode and/or when it's particularly cold outside. 1 Be sure the thermostat is set properly. Raise the set temperature 5 degrees F. and then wait a few minutes for the heat to come on. 2 Be sure the room-heating registers are open. 3 Check the heat pump filter.

Press to activate the wireless remote's air temperature sensor. This will also transfer the temperature sensing function from the indoor unit to the remote.

OPERATION INSTRUCTIONS - LennoxPROs.com

We built our home in 2012 and installed a new Lennox heat pump. It started having issues during our second summer in the home, and it completely stopped operating this spring, 2019. Since it has a five year warranty, Lennox will not take any responsibility for replacing it. My experience with its customer service department was ridiculous.

Lennox Heat Pump | Reviews | FurnaceCompare®

Enjoy year-round comfort with this energy-efficient heat pump from Lennox. With efficiencies of up to 16 SEER and 9.5 HSPF, the XP14 heat pump is also quiet, with sound levels as low as 71 dB thanks to the precision scroll compressor. This heat pump is also compatible with the company's programmable thermostat, which allows you to control the system remotely.
