As of version 6.0 the Muhimbi PDF Converter for SharePoint supports cross-conversion of documents. An absolute brilliant new feature that, in addition to converting documents to PDF, makes it possible to convert between versions of file formats (doc to docx, xlsx to xls etc) and even between completely different file types (InfoPath to Word, Excel and HTML or Excel to MS-Word).

I had tested a solution using "file size is between" and went with a low limit of 1K, and very large. Works well sifting out other files, but errors on the document set. I realize that was a quick and imperfect solution. Can I use "if file is a specific type"? Anyone know a doc set file type value that Nintex workflow will recognize?
