The correct answer is (B). Microtubules, microfilaments and intermediate filaments are parts of the cytoskeleton structure. The endoplasmic reticulum, golgi apparatus, lysosomes, and vesicles form the endomembrane system. The mitochondria and chloroplasts change energy from one form to another. Fimbriae, nucleoid and flagella are components of ...

AP Biology Practice Test: Unit 2 — Cell Structure & Function

However, animal and plant cells also have some fundamental differences. Animal cells, unlike plant and fungi cells, do not have a cell wall. Instead, multicellular animals have other structures that provide support to their tissues and organs, such as skeleton and cartilage. Additionally, animal cells also lack chloroplasts found in plant cells ...
