- ST3 is a chemical tanker intended to transport products requiring moderate degree of containment to increase survival capability in a damaged condition. The IBC Code lists, in its fourteen chapters, the requirements that must be satisfied by a ship prior to it being certified as a chemical tanker regardless of the specific cargoes it is intended to carry. Within each chapter the designer is ...

CHEMICAL TANKERS - Wartsila.com

The tanker loading and unloading process often includes the inspection of the truck, trailer, and equipment, and verifying that the right tanker is unloading the right chemical product into the right storage tank. It also requires an expert level of competence by the driver to pay attention while the process is ongoing and spot potential issues before they develop.

The Loading and Unloading Process of A Liquid Bulk Tanker

In order to do this, the FMCSA changed the definition of a “tanker,” which, in turn, has changed the requirements for which drivers are required to hold a “tanker endorsement” on their CDL. This change means that even those who are driving dry vans, reefers, flatbeds, and box trucks will be required to hold the endorsement if they meet the requirements below. If the following ...
