Revised Selected Papers Part I

They made possible, by the Springer LNCS, the worldwide distribution of Eurocast most important effects: bringing over the years scientists and engineers of different age, background and academic institutions, together to share their experience in the design and analysis of systems using advanced mathematical methods for model-building and efficient algorithms for computer implementations.

Computer Aided Systems Theory - EUROCAST 2017 | SpringerLink

Introduction. The concept of CAST as
Computer Aided Systems Theory, was
introduced by F. Pichler of Linz in the
late 80's to include those computer
theoretical and practical developments
as tools to solve problems in System
Science. It was considered as the third
component (the other two being CAD
and CAM) that will provide for a
complete picture of the path from
Computer and Systems Sciences to
practical developments in Science and
Engineering.

Computer-aided design (CAD) is the use
of computers (or workstations) to aid in
the creation, modification, analysis, or
optimization of a design. CAD software is
used to increase the productivity of the
designer, improve the quality of design,
improve communications through

documentation, and to create a database for manufacturing. CAD output is often in the form of electronic files for print ...

Computer-aided design - Wikipedia

Introduction. In software engineering, a software development methodology (also known as a system development methodology, software development life cycle, software development process, software process) is a division of software development work into distinct phases (or stages) containing activities with the intent of better planning and management.. It is often considered a subset of the ...
