### **Study/Resource Guide for Students and Parents Geometry**

The perimeter of a figure is the length around it. To find the perimeter of a polygon, add the lengths of its sides. Start by filling in the missing lengths of the sides. For instance, the length of the shorter missing side is 6 because if you add it to the 3 on the left, the result should be the 9 on the right.

### **Geometry Practice Questions - Study Guide Zone**

To find the perimeter, just add up the lengths of all the sides. If the polygon is regular (all sides are congruent) and the length of one side is  $s$ , then multiply the number of sides by  $s$  to find the perimeter. For example, the perimeter of a regular pentagon is  $P_{\text{reg pentagon}} = 5s$ .

### **Page 1 of the Geometry Study Guide for the Math Basics**

Geometry is the fourth math course in high school and will guide you through among other things points, lines, planes, angles, parallel lines, triangles, similarity, trigonometry, quadrilaterals, transformations, circles and area. This Geometry math course is divided into 10 chapters and each chapter is divided into several lessons. Under each lesson you will find theory, examples and video lessons.
