Questionnaire Design and Surveys Sampling

Although comparing environmental metal concentrations with environmental water or sediment quality benchmarks is useful for screening-level ecological risk assessments (Chapman 2018; van Dam et al. 2019), biological assessments based on field surveys of natural populations and communities are imperative for understanding the ecological consequences of exposure (Barbour et

al. 1999; Crane et ...

What to Survey? A Systematic Review of the Choice of ...

1 Introduction. Globally, groundwater is widely used for drinking, food preparations, irrigation, and industrial purposes (Van Weert et al., 2009). Intensive groundwater extraction for irrigation and municipal water supplies in many coastal areas around the world has resulted in lower groundwater quality by inducing saltwater intrusion (Ferguson & Gleeson, 2012).
