Sliding / No Separation (Nastran: Slide) With this type of contact the element will act similar to a welded contact element in tension and compression, but will slide in-plane. Friction is ignored for this contact type, so contact data should not include friction settings. Slide contact can be used in linear and nonlinear solutions.

Click to Unmute. This opens in a new window. Engineers use MSC Nastran to ensure structural systems have the necessary strength, stiffness, and life to preclude failure (excess stresses, resonance, buckling, or detrimental deformations) that may compromise structural function and safety. MSC Nastran is also used to improve the economy and passenger comfort of structural designs.
