To conclude, self-regulated learning and self-efficacy beliefs are dependent; both need the presence of particular cognitive capacities, such as the ability to self-monitor, set goals, make judgments, and reflect. Students with a high sense of self-efficacy will self-regulate themselves by setting goals and seeking assistance from their colleagues and teachers. Therefore, teachers need to have ...

Albert Bandura: Self-Efficacy for Agentic Positive Psychology

Adaptive Benefits of Optimistic Self-Beliefs of Efficacy There is a growing body of evidence that human accomplishments and positive well-being require an optimistic sense of personal efficacy. This is because ordinary social realities are strewn with difficulties. They are full of impediments, adversities, setbacks, frustrations, and inequities. People must have a robust sense of personal ...

The General Self - fu-berlin.de

Equity Theory can be broken down into four basic propositions (Huseman, Hatfield, & Miles, 1987). 1. Individuals develop their perception of fairness by calculating a ratio of their inputs and outcomes and then comparing this to the ratio of others (Huseman, et. al., 1987). For example, an individual may not perceive he is being treated fairly when he works 40 hours per week (input) and ...

5. Equity Theory - PSYCH 484: Work Attitudes and Job Motivation ...

Confidence is a state of being clear-headed either that a hypothesis or prediction is correct or that a chosen course of action is the best or most effective. Confidence comes from a Latin word 'fidere' which means "to trust"; therefore, having self-confidence is having trust in one's self.

Arrogance or hubris, in comparison, is the state of having unmerited confidence—believing something or ...
