How to Create a SQL Server Database: 12 Steps (with Pictures)

Starting with SQL Server 2016 (13.x) and in Azure SQL Database, you can create a nonclustered index on a table stored as a clustered columnstore index. If you first create a nonclustered index on a table stored as a heap or clustered index, the index will persist if you later convert the table to a clustered columnstore index. It is also not necessary to drop the nonclustered index when you ...
